

# Caregiver Links Program

Advocacy – Education - Referrals

This program is open to anyone who is in a caregiver role. Caregivers need to develop a sound plan in order to arrange the best care possible for their loved ones and avoid crisis in the future. Review the following services to determine your needs now and in the future.

## Advocacy

Resource Specialists are available through Swanton Health Care to help those in need and the family caregivers they rely navigate the services in the community and cut down on time and expense finding needed services.

## First Call – Every Time

We eliminate the wasted time searching for reliable service providers by starting with one call/contact,

419 464-3897 or [ccremean@swantonhealthcare.com](mailto:ccremean@swantonhealthcare.com).

This call/contact will put you in touch with a Resource Specialist who will discuss how benefits work, how to build a solid relationship with your loved one and give referrals to quality providers.

## Education

Seminars are held the **last Tuesday of each month** at either 3:00 – 4:30 pm or 7:00 – 8:30 pm. Sessions are Open Forum, so you can discuss the topics that are important to you at that time. Sharing with others helps to cope with the situation you have. Information on benefit programs, providers and caregiver tips are available. Those who are either now a caregiver or anticipate being a caregiver in the near future are invited.

Registration is free, just call 419 464-3897 to reserve a seat. Bring the whole family, if you wish.

## Referrals

The Resource Specialist will direct you to a quality provider, as needed.  
Local providers are those that already have good working relationships with each other, making care transitions smoother.
